SUGGESTIONS, Etc. to ASSIST you in ORDERING, and for insuring the PROMPT and CAREFUL attention to all ORDERS and inquiries.

REMITTANCES can be made by Check, Express or Postal Money Orders, Registered Letter, or 2c. postage stamps.

PHILADELPHIA, PA., January, 1906.

Announcement "FREE DELIVERY."

We take this opportunity to inform our many friends and customers that on and after **January 1st 1906**, we will **deliver free** by **Package Express** where this service is in operation, all orders that can be packed weighing up to 50 lbs, (this being the weight limit by this service) and such as will be accepted by them. This service applies to **Package Express** from **Broad St. Station** (Penna. R. R.), **Reading Terminal** (Reading R. R.), **B. & O. R. R.** (24th and Chestnut Sts.), **Market St. Ferry** (Penna. R. R.), **Chestnut St. Ferry** (Reading R. R.).

NOTE: All shipments sent to Penna. R. R. points, must be **removed promptly**, as the railroad company claims a charge of 5c. per package for every 24 hours the package is allowed to remain at your Station over one day.

Orders. These may be sent to us at any time, unless instructed to the contrary we will ship them at once. **Early Ordering** is especially advisable as invariably we become so busy during the months of **March** and **April**, it is almost impossible to fill and ship orders upon receipt of same. Remember, however, even tho' we are very busy, should you desire any order at any particular time, if you request us to, we always try to live up to your wishes. Orders received early for future shipment, are filled at once and packed and reserved for instructions to ship.

Shipping Instructions. We will consider it a favor, if you will be particular in writing out your kind orders, to specify by what method you desire them forwarded, viz: **Baggage Master, Boat, Express** (Local, Adams, American or United States) or **Freight**. Where no instructions are given, we always use our best judgment, should you not know what method of transportation to employ, we are always very glad to assist in naming you the lowest Freight and Express charges, or advising you as regards the best manner to forward.

Express Shipments. By special arrangements with the **Adams and United States Express** Companies, we are able to ship by express over their lines any merchandise, such as **Seeds, Plants and Bulbs** at a reduction of **20%** from the regular rate.

Addresses. Please write distinctly your **Name, the Post Office, Shipping Address, Town, County and State**; this generally overcomes many difficulties.

Packing. No charges are made for this excepting a charge of 18 cents for each 2 bushel seamless bag, used on all farm and heavy seeds. This amount is refunded at any time upon the return of the bags which are charged at actual cost, we thus provide insurance on the safe arrival of seeds thus packed.

Safe Arrival. This we guarantee in every instance. The arrival of an article, in any but satisfactory condition should be reported at once, so we can adjust same promptly.

Care. The greatest precaution is used in filling all orders to reduce the possibility of error to a minimum. Where a mistake has been made, please inform us at once. (They will occur in our busy season when we are obliged to add numerous additional help to our regular large force). Such errors are adjusted at once without any expense at all to the customer.

Postage. We pay postage charges on all orders for packets of seeds (Pints, Quarts not included), the latter should be remitted for in Paid Orders, viz: for pints of Beans, Peas and Corn, 8c.; 15c. for quarts. Grass Seeds may be prepaid by post for 5c. per quart, excepting Clover and Timothy, which require 8c. per pint, 15c. per quart. Packages by mail are limited to four pounds.

Deutsche Correspondenten. Deutsch Sprechende Kunden werden höflichst ersucht ihre Bestellungen in deutscher Sprache einzusenden, und werden dieselben auf das Sorgfältigste ausgeführt.

PARTIAL VIEW OF A FEW OF THE GARDENS OF THE PHILADELPHIA VACANT LOTS CULTIVATION SOCIETY.

The photographs above and below give partial views in two gardens of the Philadelphia Vacant Lots Cultivation Society. The work of this Society has never been fully laid before the general public. The undertaking of so large and important work was indeed necessary as it has proven beneficial. The Society provides the land, prepares it by means of fertilizing, etc., and furnishes the seed, *all without cost to the gardener*, who chooses to work it. Besides furnishing means of procuring fresh vegetables for their own family use, they are permitted to sell any of the produce they may care to. This gardening scheme has brought with it many improvements, viz.: The

objectionable vacant grounds that were in a few years gone by, smouldering trash heaps and depositories for tin cans, etc., are now transformed into vigorous and well-cultivated gardens for growing vegetables of all kinds. At the same time another point is in view, that is, the training of the poorer people, employed and unemployed (especially children), who are greatly benefited by the healthful outdoor exercise and who would otherwise waste all their spare time in roaming the streets.

SEEDS AND SUPPLIES FOR THESE GARDENS ARE FURNISHED BY US.

Novelties and Specialties in Vegetables, Etc.

THE "LONGFELLOW" BEAN (Green Podded)

This sort is an "extra early" snap short variety, very prolific, bearing long green pods, usually 6 to 7 inches long, always tender and delicious. The color is retained after cooking to a remarkable degree. Picking may be commenced four to five days in advance of any other green podded variety. Price, per pkt. 10c., 20c. per pt. (postpaid 28c.), per qt. 35c. (postpaid 50c.), \$1.25 for 4 qts., per pk. \$2.25, \$8.00 per bu.

EARLY CELERY "SNOWDRIFT"

This Celery is particularly valuable owing to its extreme earliness. It surpasses White Plume in most every way, being earlier, much larger and more brittle. It has proved in many cases to command higher prices where sold in market. The color is almost entirely white, it being a free blancher, and is not subject to rust. Price, per pkt. 10c., 20c. per ½ oz., per oz. 35c., \$1.25 per ¼ lb.

Celery—French Golden Self-Blanching

A decided improvement over the old Golden Self-Blanching Celery. We have obtained our stock of seed from the originator and can thus guarantee every seed we sell of this to be genuine. It is crisp, very nutty and finely flavored. A most excellent early winter variety, coming in after the White Plume. It is of a beautiful golden yellow color and has an abundance of heart. Many of our customers who used it the past season have pronounced it the finest celery they have ever grown. Price, per pkt. 10c., 25c. per ½ oz., per oz. 45c., \$1.40 per ¼ lb.

EARLY SUGAR CORN "IDEAL"

After careful experimenting for years, this valuable sort has been offered for sale this season. Our grower, who introduced it, claims for it extreme earliness, great productiveness and pronounced sweetness and flavor. All these points, so valuable in sugar corn, he claims to have attained by a series of careful selection. We have procured a limited quantity of this excellent variety and can recommend it to our customers. Price, per pkt. 5c., 15c. per pt. (postpaid 20c.), per qt. 25c. (postpaid 35c.), 85c. for 4 qts., per pk. \$1.50, \$5.00 per bu.

Ears of the above variety, each 15c. postpaid, \$1.25 per doz.

New Celery—"Snowdrift"

TESTIMONIALS

SANTA LUCIA,
HONDURAS, CENTRAL AMERICA.

Please send me the enclosed list of seeds. Yours have always done well, despite the fact that we are 5,000 feet above the sea level.

Sincerely,
H. A. OWEN.

CHARLESTON, S. C.

The seeds you sent me last week are up and doing fine. Those from you have given more satisfaction than any I have planted in years, and it is a source of great pleasure for me to grow them.

C. A. CHISOLM,
President of N. C. Agricultural Society.

SUGAR CORN ARISTOCRAT

A very valuable addition to the Sugar Corn family, although on the market but a few seasons, it has proved itself to be worthy of extensive cultivation. We offer for the first time this excellent sort, having obtained the seed stock from the introducer and grown it with our most careful sugar corn producer in Connecticut Valley. It is exceedingly sweet; produced on ears 8 to 10 inches long. The fodder is not rank growing, but the corn is extra early, coming into market about the same time as the Cory and First of All types. Price, pkt. 10c., 20c. per pt., qt. 35c., \$1.20 for 4 qts., pk. \$2.10.

EGG PLANT BLACK BEAUTY

Pronounced a great improvement over the old favorite, New York Improved. The growth of the plant seems hardier than the above named sort and more liable to resist the attacks of insects. The fruit is very large, of a purplish black hue, an excellent keeper and quality the best. Price, pkt. 10c., 20c. per ½ oz., oz. 40c., \$1.25 per ¼ lb.

SUGAR CORN

Michell's Sugar Loaf

This is a most exquisite variety. Was originated in New England. It is quite an early sort, producing nice cylindrical ears. The color of the grain when ripened is a deep golden yellow. The flavor and taste are all that can be desired. It entirely displaces all other corns, while it is in picking condition. Price, pkt. 10c., 30c. per pt., qt. 50c., \$1.50 for 4 qts.

Sugar Corn Aristocrat

MUSKMELON OR CANTALOUPE "DELICIOUS"

Size is very large, color outside a dull gray, inner color a rich golden yellow, exquisitely flavored and with few seeds. Every garden growing cantaloupes should include this valuable sort. Seed stock limited. Price, pkt. 15c., 25c. for 2 pkts.

Egg Plant—Black Beauty

A SATISFIED CUSTOMER

I am sending you by express two Egg Plants. They certainly proved immensely satisfactory. My Cabbage has also been fine; had heads weighing 15½ lbs. I planted 1½ bushels of your State of Maine Potatoes and have just finished digging up 25 bushels; most of them averaged 22 ounces each. The Scarlet Sage is a sight to see; people passing by are stopping constantly to admire them and ask where I bought my seed. I tell them yours have always proved entirely satisfactory.

Pepper—Chinese Giant

It is a tremendous producer, and in short can readily be called the "Ideal Pepper." Price, pkt. 10c., 20c. per ½ oz., per oz. 35c., \$1.25 per ¼ lb.

RUXTON, MD.

I had splendid success with all your seeds last season. My Tomato crop was immense. I had bushels of ripe fruit when my neighbors hardly had blossoms.

TWO GOOD LETTUCES FOR 1906 Mitchell's Number One

This Lettuce is a positive header under the most trying weather conditions. It is tender, of a decided buttery flavor, and immensely large. An especially valuable type for hot weather; also very desirable for autumn use outside. We have known instances where this lettuce brought twice the price on market the past season of other sorts. Price, 10c. per pkt., per $\frac{1}{2}$ oz. 15c., 30c. per oz., per $\frac{1}{4}$ lb. \$1.00, \$3.00 per lb.

"Unrivaled"

Offered as an improvement on the Big Boston Lettuce. The heads are very large, green and of a crisp nature. Very desirable for summer use. Should be included in every garden where lettuce is grown. Few varieties surpass it for general use. Price, 5c. and 10c. per pkt., per oz. 20c., 60c. per $\frac{1}{4}$ lb.

Tomato, Mitchell's Very First

For earliness no tomato can approach the "Very First." In trial grounds we have found it to ripen about **five days earlier than Earliana**. It is very large and solid and with very few seeds, it is hence very meaty. Tomatoes picked from vines last year weighed from 15 to 16 ounces. Color is a bright red; an even ripener. Our seed stock was limited last spring, so we could offer it in packets only. This year the supply is large, and we are in position to sell in quantity to those who wish to plant extensively. Price, 15c. per pkt., per $\frac{1}{2}$ oz. 25c., 50c. per oz., per $\frac{1}{4}$ lb., \$1.75.

Mitchell's Very First Tomato

Mitchell's Number One Lettuce

Tomato, June Pink

This tomato is being introduced this season for the first time by the originators of the famous "Earliana." They describe it as follows: Habit of growth, earliness, bearing qualities and shape of fruit just like the above named sort. The color is the only difference, it being of a bright pink. We can earnestly recommend this valuable type to our customers. Pkt. of 40 seeds 20c., 55c. for 3 pkts.

New Pea Dwarf Champion

Most all growers of peas know the special merits of the favorite Champion of England variety. This sort possesses all of the good qualities of the above variety, but is dwarfier in habit, the height being about 26 inches. It is a wonderful producer of pods, well filled with peas of exceptional quality and a deliciously sweet flavor. Price, 10c. per pkt., per pt. 20c. (postpaid 28c.), 35c. per qt. (postpaid 40c.), per 4 qts. \$1.20, \$2.25 per pk.

CONDENSED PRICE LIST OF VEGETABLE SEEDS

This list is arranged for the busy man or woman who wishes to write out an order. It embraces every variety of vegetable offered by us in this catalogue. Every variety is numbered, so it will not be necessary to write out the names (if you do not wish to,) although it usually helps our new order clerks to fill orders more rapidly if you would. Be sure and write the proper number, as an error here would cause you to get the wrong variety of seeds.

How to Succeed in Growing Brussels Sprouts

Sow in hotbed in April; when large enough transplant to the open ground, placing them about 1½ feet apart, in rows 2 feet apart. Cultivate the same as cabbage; when the sprouts commence to form on the stalk take off the leaf stems, allowing the plants to grow until the edges start to turn. By treating them this way a much larger crop can be harvested.

Matchless Improved. The most desirable kind. Per pkt. 5c. and 10c., 15c. per ½ oz., per oz. 25c., 75c. per ¼ lb.

CELERY.

Celeri (Fr.)

One ounce of seed will produce about 2,000 plants.

Sow the seed late in March, or early in April, on fine, well-worked soil. Cover slightly, or better still, roll or press it. Shade the young plants for a week or ten days, and do not let the soil dry out. Cut them once or twice before setting out to make them stocky. When from four to six inches high transplant into broad shallow trenches or to level ground, setting dwarf sorts in rows three feet apart, and tall sorts four feet apart, six inches apart in the rows. To store for winter use select well-drained ground, dig trenches one foot wide and deep enough to cover tops of plants. Pack stalks in this in an upright position, covering with boards to shed the water, and in severe weather protect with straw or leaves and celery paper.

Early Evergreen. Most all know the merits of the popular Stowell's Evergreen. This variety is closely allied to the latter in shape, flavor and style, but is much earlier. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Early Mammoth. The ears and fodder both attain gigantic proportions. The former, besides being large, is handsome in appearance and exceedingly sweet. Matures just after the extra early types. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Honey Dew. This variety was introduced several seasons ago and has become quite popular. Its name is very deserving to the type and quality of corn it yields. The ears are of medium size and extremely sweet. An early sort. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Ideal. In corn the ideal is hard to attain. The grower of this variety has been carefully selecting it for the past fifteen years with great care. He assures us we are not only offering a good corn, but the very best obtainable. Exceedingly sweet, very early and large yielder. Pkt. 5c., 15c. per pt. (postpaid 20c.), per qt. 25c. (postpaid 35c.), 85c. for 4 qts., per pk. \$1.50, \$5.00 per bu.

First of All. The grain, when in the dry state, is slightly reddish; when green, however, it is like most other sorts of the sugar corn family. Handsome in appearance and forms a medium size ear. Most gardeners prefer it for their first and last planting. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Kendel's Early Giant. This is the largest of the early sugar corns and is finely flavored. It is a great producer and will bring more in market than most other sorts. Also very desirable for the last planting. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Little Gem or Shoe Peg. The grain, like Country Gentleman, is very irregularly staged on the ear. For flavor, sweetness and general appearance, there are few to equal it. Regarded as a second early variety. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Late Mammoth. This is the largest sort in cultivation. The quality is extra fine and it is very productive. Pkt. 5c., 10c. per pt. (postpaid 15c.), 20c. per qt. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Mitchell's Delicious. This variety is controlled by us exclusively, introduced some years ago. It has proved highly satisfactory. The quality and taste are all that can be desired. Excellent second crop sort. Pkt. 10c., 20c. per pt. (postpaid 25c.), 35c. per qt. (postpaid 45c.), \$1.20 for 4 qts., per pk. \$2.00, \$7.00 per bu.

Premo. A fine type of sugar corn, earlier than any of the large-eared sorts. Exceedingly luscious and should have a place in every vegetable garden. Pkt. 5c., 15c. per pt. (postpaid 20c.), per qt. 25c. (postpaid 35c.), 80c. for 4 qts., per pk. \$1.30, \$5.00 per bu.

Peep-o-Day. This corn has two valuable points—extraordinary earliness and unsurpassed sweetness. It may be used as an early or late variety with equal success. Each stalk produces from three to five well-developed ears. Pkt. 5c., 15c. per pt. (postpaid 20c.), per qt. 30c. (postpaid 40c.), \$1.00 for 4 qts., per pk. \$1.50, \$6.00 per bu.

Roslyn Hybrid. One of our favorite late varieties, maturing with Stowell's Evergreen. Very good in every way. Large ears. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.10, \$4.50 per bu.

Squantum. (Potter's Excelsior.) As a second early sort this will be found very desirable. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Stabler's Extra Early. Usually produces ears larger than most of the early sorts. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Stabler's Nonpareil. This sort is very similar to the above variety. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Stowell's Evergreen. Description and explanation regarding this variety is hardly necessary. It is the best late sort that has yet been introduced. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Sugar Loaf. The ear when developed, matured and cooked presents a golden yellow appearance. This point is not exactly objectionable, as the corn otherwise is all that might be desired. Very early. Pkt. 10c., 30c. per pt. (postpaid 35c.), per qt. 50c. (postpaid 60c.), \$1.50 for 4 qts., per pk. \$2.75, \$11.00 per bu.

Zigzag Evergreen. This sort is a heavy producer and deliciously sweet; is a late sort, maturing with Stowell's Evergreen. Pkt. 5c., 10c. per pt. (postpaid 15c.), per qt. 20c. (postpaid 30c.), 65c. for 4 qts., per pk. \$1.15, \$4.50 per bu.

Laitu (Fr.).

One ounce of seed will produce about 1500 plants.

For early winter use, sow the seed in September in hot beds—when large enough, thin out and transplant about 10 inches apart each way. Repeated sowings can be made during the entire season for a continuation. For outdoor, sow under glass in February and March, and transplant when large enough to open ground in March and April. As there are various kinds for the different seasons it is well to select the proper sort to insure satisfaction. When head lettuce is not desired, sow and leave stand without thinning out.

Zwieble (Ger.) **ONION** Ognon (Fr.)
One ounce for 100 feet of row; for sets 50 lbs. to the acre.
 For sets, sow the seeds as early as possible, in the Spring, very thickly, in drills. As soon as the tops die off in Summer, remove them to a dry, airy place; and early in the following Spring, replant them by placing sets in shallow drills twelve inches apart and about four inches apart in the drills. They may also be grown to full size during the first season by sowing thinly in drills, one foot apart and about one-fourth of an inch deep, in March or early in April, well manured, and thinning them out to stand three or four inches apart in the drills. They delight in a strong, rich, deep, loamy soil, and succeed well if grown successive years on the same ground.

Mitchell's Dandy Extra Early Peas

Erbsen (Ger.)

PEAS

1 Quart to 100
Feet of Row.

Pois (Fr.)

PEAS succeed best in light, dry loamy soil. Early and dwarf sorts require richer soil than the late varieties. If manure is used, let it be old and well rotted, or there will be a rank growth of vines with few pods. Sow the early, smooth, round sorts as early in the Spring as the ground can be worked. Seeds of wrinkled varieties are more liable to rot if the ground is cold, and must be planted later. Sow in single rows, dwarf sorts three feet apart, and tall sorts four feet, or in double drills, six to eight inches apart, one inch apart in the drill, and not less than four inches deep, for late sorts five to six inches deep. Deep planting prevents mildew.

POTATOES

Pomme de Terre (Fr.)

Grown Especially for Seed Purposes.

A HILL OF MICHELL'S "BEATS THEM ALL" POTATO

GROWN ESPECIALLY FOR SEED PURPOSES

Plant ten bushels to the acre.

THE soil best suited to the potato is a rich, sandy loam; being a gross feeder, it requires a liberal application of manure; if stable manure is to be used it should be well rotted and not allowed to come in contact with the tubers. On no other crop are the results from the use of phosphates so manifest as on the potato; almost invariably the tubers are brighter, smoother and freer from rust and the destructive influence of wire worms. The best fertilizers are plaster, lime and bone phosphate, for heavy and wet soils especially, as they promote growth, and at the same time prevent disease. Plant as early in the spring as the ground can be thoroughly worked, in rows three feet apart and one foot in the rows.

NOTICE. Our Seed Potatoes are all Northern Grown.

INFORMATION

The grass seed part of our business is studied, with every possible advantage and feature in view. We are constantly experimenting on lawns, pleasure grounds, and pasture lands with our grass mixtures, endeavoring to bring them to the highest state of excellence. We are always glad to give information by letter to persons desiring it, for overcoming obstacles, conditions, etc. in establishing, putting greens, and other grass locations.

Michell's Permanent Pasture Grass Seed

Few, if any, grass mixtures enjoy such an enviable reputation as this. We have found it to give the most satisfactory results wherever sown. The seed put down in March will by June produce a sod sufficiently strong enough to turn cattle on. It is comprised of Fancy Kentucky Blue Grass, Fancy Herd Meadow Fescue, and other special grasses in the proper quantities. Sow $2\frac{1}{2}$ bu. per acre, (20 lbs. per bu.) Price \$3.00 per bu., (5 bu. at \$2.75 per bu.), (10 bu. at \$2.60 per bu.), (50 bu. at \$2.40 per bu.)

Apply at the rate of 600 lbs. per acre. **Prices:**—5 lbs. 30c., 50c. for 10 lbs., 25 lbs. \$1.00, \$1.75 for 50 lbs., 100 lbs. \$3.00, \$5.00 for 200 lbs., per ton \$40.00.

IF YOU'VE ANY FAVORITE MIXTURE OF YOUR OWN WE'LL BE VERY GLAD TO MAKE IT, NO CHARGE FOR MIXING

Mitchell's, Non-Superior Evergreen Lawn Grass Seed. Too well known to need description. We have a national reputation on this grass formula. The BEST LAWN GRASS SEED that exists for general use. Thousands of bushels sold annually; used by all the large estate managers, country clubs, and cemetery superintendents. A trial will convince you of its merits. Sow 4 bushels per acre on new lawn, or 2½ bushels in reseeded old lawns. Prices: Per qt. 25c., 40c. for 2 qts., 4 qts. 65c., \$1.00 per pk., per bu. of 20 lbs. \$4.00; (5 bu. lots at \$3.75 per bu.), (10 bu. \$3.50 per bu.), (50 bu. \$3.25 per bu.)

Mitchell's Shaded Lawn Grass Mixture. Difficulty is frequently experienced in establishing a lawn where shade and other trees exist. This has been entirely overcome by the introduction of this fine formula. Those who have used it cannot get along without it for seeding shaded locations. Results are most gratifying. Will never fail if properly sown. Prices: Per qt. 25c., 40c. for 2 qts., 4 qts. 65c., \$1.00 per pk., per bu. of 20 lbs. \$4.00; (5 bu. lots at \$3.65 per bu.), (10 bu. \$3.50 per bu.), (50 bu. \$3.25 bu.)

Fairmount Park Lawn Seed. A very fine mixture indeed, meeting the requirements of those desiring a moderately priced grass seed. Sow 4 bushels to the acre on new land or 2½ bushels on old ground. Prices: Per qt. 20c., 35c. for 2 qts., 4 qts. 50c., 75c. per pk., per bu. of 15 lbs. \$2.75; (5 bu. lots at \$2.50 per bu.), (10 bu. \$2.30 per bu.), (50 bu. \$2.20 per bu.)

Evergreen Grass with no Clover. Many people do not like white clover in a lawn, and they may as well have one entirely devoid of it. This mixture fills that want entirely. Price: Per qt. 25c., 40c. for 2 qts., 4 qts. 65c., \$1.00 per pk., per bu. of 20 lbs. \$4.00; (5 bu. lots at \$3.65 per bu.), (10 bu. \$3.50 per bu.), (50 bu. \$3.25 per bu.)

Mitchell's Seashore Formula Grass Seed Mixture. The salt atmosphere plays havoc with the seashore lawn, and unless the proper formula of seed is sown, trouble is sure to come. Contains such grasses only as thrive best in salt air regions; no reason why you cannot have as fine a lawn at the summer resort by the sea as at the country residence. Sow 4 bushels to the acre on new ground or 2½ bushels for reseeded old lawns. Prices: Per qt. 25c., 40c. for 2 qts., 4 qts. 65c., \$1.00 per pk., per bu. of 20 lbs. \$4.00; (5 bu. lots at \$3.65 per bu.), (10 bu. \$3.50 per bu.), (50 bu. \$3.25 per bu.)

Mitchell's Terrace or Embankment Grass Seed Mixture. A serious problem that always confronts the gardener after a rainstorm is the replacing of washed-out places in the terraced lawn. By sowing our Embankment Mixture there will be no fear of this. Compounded especially for this purpose, and will stand critical tests. Sow at the rate of 4 bushels per acre. Prices: Per qt. 25c., 40c. for 2 qts., 4 qts. 65c., \$1.00 per pk., per bu. of 20 lbs. \$4.00; (5 bu. lots at \$3.65 per bu.), (10 bu. \$3.50 per bu.), (50 bu. \$3.25 per bu.)

Mitchell's Golf Course Grass Seed Mixture. There's no dread of defeat on the fair greens or links where this seed is sown. No obnoxious growth to obstruct the rolling of the ball. A big boon to the lover of the golf course. Sow 5 bushels per acre. Prices: Per qt. 20c., 35c. for 2 qts., 4 qts. 50c., 70c. per pk., per bu. of 15 lbs. \$2.50; (5 bu. lots at \$2.25 per bu.), (10 bu. \$2.15 per bu.), (50 bu. \$2.00 per bu.)

Mitchell's Putting Greens Mixture. This is a new mixture of our own; made up especially from such grasses as will grow very short and make a solid surface to withstand heavy wear, and positively no obstruction or interruption to the rolling golf ball. Prices: Per qt. 25c., 40c. for 2 qts., 4 qts. 65c., \$1.00 per pk., per bu. of 20 lbs. \$4.00; (5 bu. lots at \$3.65 per bu.), (10 bu. \$3.50 per bu.), (50 bu. \$3.25 per bu.)

Lawn Tennis and Polo Grass Seed Mixture (Mitchell's). The game can be enjoyed much better when the proper grass (where grass is still used on tennis courts) is under foot; growth is short and compact, of rich green verdure. Sow 4 bushels per acre on new lawn or 2½ bushels on old lawns (partially covered with growth.) Prices: Per qt. 25c., 40c. for 2 qts., 4 qts. 65c., \$1.00 per pk., per bu. of 20 lbs. \$4.00; (5 bu. lots at \$3.65 per bu.), (10 bu. \$3.50 per bu.), (50 bu. \$3.25 per bu.)

GRASS MIXTURES FOR FIELDS

Mitchell's Permanent Pasture and Hay Grass Mixture. A composition of varieties of grasses best suited to the purpose named. A single seeding lasts for years; may be used as a pasture one season, the next as a hay crop. Sow 2½ bushels per acre on new land (just plowed and harrowed) or 1½ bushels on old lands (those partially covered with grass). Prices: Per qt. 20c., 50c. for 4 qts., per pk. 85c., \$3.00 per bu. of 20 lbs.; (5 bu. lots at \$2.75 per bu.), (10 bu. \$2.60 per bu.), (50 bu. \$2.40 per bu.)

Exposition or Quick Growth Mixture. When we had the National Export Exposition in Philadelphia in 1899, the landscape contractor agreed to furnish a lawn with grass growing on it in four weeks. He came to us and we solved the problem. This is also largely used in fields for pasturage, or when an immediate growth is desired. The *Torresdale Filter Beds* are seeded with almost 1,000 bushels of this (15 lbs. per bushel). Prices: Per qt. 20c., 30c. for 2 qts., per pk. 65c., \$2.25 per bu.

Mitchell's Hay Field Mixture. We have compounded this mixture of grasses for the sole purpose of giving the farmer a thoroughly reliable mixture of seed suitable for hay. When sown and established this grass will stand for years with an occasional seeding of a small amount to make up for any worn out spots. Sow 2½ bushels per acre (20 lbs. per bu.) Price 20c. per qt., 4 qts. for 50c., 85c. per pk., per bu. \$3.00, (5 bu. lots at \$2.75 per bu.) 10 bu. lots at \$2.60 per bu.) (50 bu. lots at \$2.40 per bu.)

CLOVERS, Thoroughly Recleaned (60 lbs. per Bushel)

Crimson Clover Blossom

Alfalfa or Lucerne (*Extra fancy Utah grown*). Alfalfa is gradually becoming a staple and most necessary crop of the farm. It makes the finest clover imaginable and when once established in the soil it is good for many years. The seed offered by us is absolutely free from any adulterant. For a sure crop sow 30 lbs. per acre, from April 1st to September 1st. Height about 2½ feet. Four crops may be cut in one season. Alfalfa greatly increases the flow of milk and yields a richer quality. Price, 18c. per lb., pk. \$2.25, \$8.75 per bu.

Crimson (*Delaware grown*). Delaware grown Crimson Clover is far superior to imported. The latter is not well able to withstand the ravages of winter. Used principally for soiling or green manuring, is also relished by cattle when they become accustomed to it. Sow 20 lbs. per acre, any time from May until middle of October. If desired for feed, it should be cut before coming into flower. Height about 2 feet. Price, 10c. per lb., per pk. \$1.25, \$5.00 per bu.

Alsike or Swedish. This variety is classed as the hardiest clover in cultivation. It is particularly valuable when sown for mingling with other hay crops. Highly nutritious and much relished by cattle. Lasts many years where sown. Sow 10 lbs. per acre alone or 6 lbs. where sown with other grass or hay crop. Sow from April to June. Height, 1 to 3 feet. Price, 15c. per lb., per pk. \$2.15, \$8.50 per bu.

Bokhara. A tall, quick growing variety, principally used for providing food for bees. Also excellent for soiling; lasts for several seasons. Excellent for ensilage, as it may be cut several times a season. Sow early in April; 15 lbs. per acre. Height, 3 to 5 feet. Price, 30c. per lb., 10 lbs. \$2.50.

Red (*Medium*). This is the most generally used of all clovers. Principally sown for hay purposes on timothy fields early in the spring. Sow 20 lbs. per acre if alone or 15 lbs. where other grass or hay crops are standing, from March 15th to May 1st. Will yield several crops a season if properly cut. Height, about 18 inches to 2 feet. Price, 18c. per lb., per pk. \$2.25, \$9.00 per bu.

Mammoth Red (*Pea Vine Clover*). Also called English Cow Grass. This sort is very similar to the above, excepting that it grows somewhat larger and remains established longer. White Dutch or Lawn. White Clover usually makes most satisfactory returns if sown on lawns with grass seed. For field use on pasture lands it is also extremely valuable. Sow 10 to 12 lbs. per acre on land seeded with grass or other grain, from April 1st to September 1st. It creeps very rapidly and is of a dwarf nature. Our seed of White Clover is extra well cleaned. NITRO-CULTURE (For Inoculating Clovers)

The farmer who has tried this wonderful method of fertilizing worn-out soils will quickly realize again the necessity of applying only inoculated seed. Nitro-Culture is a bacterial preparation with which all legumes (to which family the clovers belong) may be successfully treated. The results are wonderful clover crops and wonderful results from other crops (not legumes) planted in after years. Price, trial pkg. 50c., \$1.50 per acre pkg., 5 acre pkg. \$5.00. For fuller description see page 38.

CHOICE CARROT SEED (For Stock Feeding)

NITRO-CULTURE

TREMENDOUS CROPS WITHOUT OTHER FERTILIZERS

What Nitro-Culture Is.—Nitro-culture consists of nitrogen collecting bacteria which work in the soil and on the roots of leguminous plants, having the power to collect free nitrogen from the air and supply it to the plants. All plants need nitrogen, which is very costly obtained otherwise.

Value as Soil Renovator.—It has been ascertained from the most reliable sources that the average inoculated leguminous crops, such as Clover, Alfalfa, Vetch, Peas, Beans, etc., will not only under ordinary conditions show an increase of crop, but also that the bacteria will collect from the air and leave in the soil at the end of the season, after the crop is harvested, not less than 100 pounds of nitrogen per acre, and would show a corresponding increase in the next succeeding crop, no matter what it may be. This nitrogen at present market prices would be worth \$15.00 and upwards per acre.

Increase of Crop.—It would be impossible for us to estimate what the increase caused by inoculation might be. Conditions vary in different sections. In some cases increases are reported to be very great, crops like Alfalfa, Clover, Vetch, Peas, Beans, etc., having been made to grow in sections where they had never been successfully grown before. We, therefore, advise our customers to try the experiment and ascertain the true value of Nitro-Culture on their respective soils.

Alfalfa.—By means of inoculation with Nitro-Culture, Alfalfa is now being successfully grown from the Atlantic to the Pacific and from Canada to the Gulf.

When ordering, state what particular crop you desire to inoculate.

Port Norris, N. J., 8-16-05.
Gentlemen:—I have an immense crop of lima beans, and farmers for miles around come to see it. The best farmers never saw its equal. If Nitro-Culture had cost \$10.00 per acre I would have been well pleased. I have in all 8,600 hills, and the cost of Nitro-Culture was \$4.00. I know by test that it made my crop one week earlier, which more than pays many times the cost of inoculation.

MICHELL'S FLOWER SEEDS

Our Flower seeds have a *reputation* for their *superior quality* and for the *excellent results* obtained by sowing them. It is our constant aim to supply only such *Varieties* and *Strains* that will give the *best of satisfaction*.

Throughout the following pages of Flower Seeds the different varieties are designated as Annuals, Biennials, Perennials, etc., and for the benefit of those who are not familiar with these terms, we wish to make the following brief explanation.

Annuals. These grow and bloom, mature their seed and then die in the same year, such as Asters, Balsams, Poppies, Sweet Peas, Morning Glories, etc.

Biennials. These live for two years and then die, most of them blooming the first year, such as Campanula, Dianthus, etc.

Perennials. Those which live from year to year, such as Aquilegia, Delphinium, Foxgloves, etc. The hardy perennials not usually needing any protection after the first winter; the half-hardy perennials require protection during the winter, and the tender perennials during the winter require greenhouse protection.

TESTIMONIAL

A Customer in Salisbury, N. C., writes:

The bulbs came in fine condition and we are very much pleased with them. Enclosed please find "Money Order."

Thanking you for your promptness

MISSES MARTIN and BROWN.

Our Stock is one of the Largest in the United States.

A more striking effect in massing or ornamental bedding can hardly be imagined, than that produced by Cannas. The range of colors is complete in the sorts we offer herewith. The roots should be purchased early if one desires to raise their own plants. Start them in February, in 4 inch pots, and keep in a dark warm place until thoroughly rooted. They should then be brought to the light and watered freely as the occasion may require. When the frosts come in the Autumn, the plants should be lifted and the tops cut off, the roots should be put in the cellar, or other suitable (not too dry) place until wanted in Spring; when the clumps may be divided and a number of roots be had. May is the best time for setting out the plants.

Alphonse Bouvier. Rich velvety red; very large truss and flower; petals broad and wavy. Each 6c., 60c. per doz., per 100 \$4.00.

MICHELL'S SPECIALTIES IN DAHLIAS

Michell's New Mammoth Dahlia, "Mrs. Roosevelt"

Dahlias need little description on account of their great popularity. To keep the bulbs from year to year, they should be lifted from the ground after the first frosts and stored in a cellar (not too dry) where the temperature remains about 40°. The clumps may be divided and planted out the following year in the month of May.

SPECIAL NOTICE

To obtain best results and large flowers from Dahlias it is advisable to take off many of the buds especially early in the season and also later when the plant is in flower.

On the opposite color plate we offer a collection of Century Dahlias which are worthy of attention. They are the cream in their respective types.

Mrs. Roosevelt. This Dahlia without exception is the finest ever offered in any class. It is large, full, and perfectly formed; the illustration will convey a partial idea of its grandeur. The color is an exquisite light pink, turning paler—almost white—toward the centre. It is a free bloomer and should be in every garden. Price, strong roots, 35c. each, 3 for \$1.00, \$3.75 per doz.

PLANET JR. POTATO DIGGER

This has been the successful White or Irish Potato Digger for the last fifteen years. This new style is far superior to anything ever sold. It works perfectly well either in green or ripe vines, and does excellent work even when the crop has become very weedy. The tines on the mouldboard tear the furrow apart and the digging tines complete the work, leaving the potatoes on the surface, in a comparatively narrow row. It is entirely unnecessary to leave every other row with this machine; all can be dug successively. Price \$15.00.

The teeth are diamond shape, with a small cultivator tooth forged on one end—steel, of course. For very close work, every other tooth can be quickly removed.

In common with all good things, this tool has numerous inferior imitations, but for solid quality, design or finish, is not approached by

them. Cultivating width when equipped with lever expander, 34 inches; with plain expander in place of lever expander, 38 inches.

By means of the lever wheel the depth may be regulated with a single stroke of the arm; the expanding lever renders it able to go through very narrow rows successfully, leaving the ground in fine condition ready for planting. No. 1—Fig. 64. Iron Age Horse Hoe and Cultivator, Complete

This represents the tool that has been carrying for years the fame of the "IRON AGE" far and wide. There is scarcely conceivable a portion of the tillable earth where it has not

been in use, or a cultivated product of the ground which it has not helped to produce. This tool is somewhat lighter than No. 6, and for this reason is still preferred by some. The frame is not so high, and consequently it is necessary to make use of a separate pair of cultivator standards when wishing to convert it into a plain cultivator. All the "IRON AGE" attachments, with the exception of the Furrow-Closing and Depth Regulator, are applicable to this admirable and well-known tool. Price, \$6.25.

PLANET JR. CULTIVATORS, ETC.

The Planet Jr. Horse Hoe is probably as well known as any cultivating implement that has ever been made. Its merits are such that from the very beginning it was recognized as a valuable addition to implements used for the cultivation of the soil, and it is now sold all over the world.

From the very beginning, the makers have improved wherever it seemed possible, but never have allowed the quality of the goods to depreciate. No inducement of increased profit has ever caused them to swerve from the determination to offer as good a tool each year as they have ever made before, or else a better one. This we believe has been true for every successive year that they have been manufacturing, and we can assure our readers and patrons that they intend this to be perpetual. We ask you to study carefully if you are interested in tools of this kind, and write us fully when you are in doubt what to buy.

The side or covering steels and shovel which is in the rear may be taken off and the arms so turned that when the extra teeth, which accompany the machine, are attached, it presents a perfect five-tooth cultivator.

It is especially adapted for shallow planting, and like the No. 1 marks out each successive row without any trouble.

The No. 1 Planet Jr. Seed Drill is a most desirable implement. It can be used as is shown above, or as a wheel hoe, by attaching any of the various attachments that accompany it, being rapidly transformed by means of unscrewing two bolts, which releases the covering wheel in the rear and the coverer. It has a perfect adjusting device for indicating the distances of opening the hopper for sowing various seeds. The marker on the side prepares a line which to follow for sowing the next row. This drill sows in continuous rows only.

No. 3 PLANET JR. SEEDER (HILL AND DRILL)

The Special Force Feed is the best known, working equally well whether sowing with a fraction of an ounce or a full hopper. The hill-dropping is simple, reliable and regular; the distances are 4, 6, 8, 12 and 24 inches. The index—The thickness of seed is regulated by an accurate index, with brass screw indicator; it contains the names of the most important seeds, and is carefully graduated both for hill-dropping and drilling. All in plain view at the top of the handle. The Cut-off—The flow of seed is instantly stopped by pulling the cut-off, and started as quickly by reversing. Not a hill need be missed in starting, nor any seed wasted in stopping. The covers are adjustable to throw more or less earth on the seed. The roller is broad and hollow-faced. Adjustable from 6 to 20 inches between the handles.

IRON AGE DRILLS AND SEED SOWERS

THE MODEL SEED DRILL

Though one of the older types of seeding devices, it is to-day as popular as any of the newer ones. The frame work is substantially made of wood, and every part works perfect. It is designed as a drill seeder only; the depth of sowing can be regulated to any desired distance. It is well named the market gardeners' drill, having a large carriage capacity for seeds, and is a wonderfully efficient machine.

Advance Drill

"ADVANCE" FERTILIZER DRILL

Packed Weight, 46 Pounds

The increased use of commercial fertilizers has fairly compelled the farmer and planter of the present day to provide himself with improved appliances for properly and economically distributing these adjuncts of modern farming.

We claim the "Advance" to be the best low-priced distributor on the market, and would call attention to its distributing disc of galvanized iron, which can neither break nor rust; also to the wrought iron wheel, which is light and strong.

A shut-off, to prevent the escape of fertilizer when wheeling around end of row, is a late improvement; being one of those little things which go far, however, in making a tool valuable.

A first-class tool for the drilling of peas and corn.

No. 22 Iron Age Fertilizer, Distributor and Seeder

No. 22 "IRON AGE" COMBINED FERTILIZER DISTRIBUTOR, HILL AND DRILL SEEDER

This has proved one of the most successful seed and fertilizer drills ever offered to the public. The fertilizer is distributed more accurately than though it were put on by hand, and the two operations—seeding and fertilizing—are done in one operation.

SAN JOSÉ SCALE REMEDIES, Etc.

THE SAN JOSÉ SCALE

The damage occasioned by scale insects is of several kinds. The first and principal injury is the extraction of the juice of the plant. While the amount extracted by a single insect is very small, when multiplied by millions, it greatly weakens the plant.

The extreme injury by scale insects arises from the fact that they are active the year around in all climates where trees are grown.

Their most rapid breeding period is from June to September, but continue through October and November. In the winter, however, when the weather is cold they are practically dormant and do not breed.

KIL-O-SCALE

Kil-o-Scale is a perfect remedy against San José Scale.

It dissolves the wax which cements the scale or protecting cover of the insect to the tree.

By contracting the scale or coating covering the insect, it thus exposes the insect itself to the direct action of the insecticide.

It forms after spraying, a coating which prevents any young scale from settling before they die from exposure.

Kil-o-Scale after applying to the tree, generates in drying, a poisonous gas, absolutely destructive to insect life.

Kil-o-Scale is made and shipped only in concentrated form, and will mix with water in any proportion, and either hot or cold.

Not being a mixture of chemicals, it is a chemical product resulting from a definite chemical process.

Kil-o-Scale may be used in the late fall, and during the winter and early spring, up until the buds swell. Will not injure the trees. Full directions on each package or descriptive circular mailed free. One gallon makes 25 gallons treating liquid.

Prices: Per qt. 45c., 75c. per ½ gal., per gal. \$1.50, \$1.25 per gal. for 5 and 10 gal. cans, 50 gal. barrels \$45.00.

"Target Brand" Scale Destroyer

That means it kills scales, larvæ, insect eggs, and all kinds of insects by forming a film, thus closing the respirative organs, which causes death.

It is composed of a non-penetrating oil combined with Resin. It is thoroughly soluble in water, and will not separate, nor does it need to be agitated while spraying. It can even be mixed a day or two before being used, and allowed to be stored in the spray tank or other vessels without separation.

It can be diluted in hard or soft water, and represents the cheapest, easiest to prepare, and the most reliable spray for fruit orchards growing on a large or small scale.

It coats the tree with a thin film killing the scale by contact, and yet the film is thin enough not to clog the pores of the tree part. It can be used as a preventative as well as a cure.

DIRECTIONS.—Dilute 1 part to 25 for winter treatment; 1 to 30 for fall and late spring treatment; 1 to 40 for summer treatment.

Price, 1 qt. 40c., 65c. ½ gal., 1 gal. \$1.00, \$4.25 5 gals., 10 gals. \$7.50.

SALT, SULPHUR and LIME

The peerless remedy for San José scale, salt, sulphur and lime, is a harmless, cheap and most effective remedy, easily prepared and applied, positively does the work thoroughly.

Concentrated. 1 gal. makes 25 gals. treating liquid. ½ gal. 80c., \$1.50 gal., 5 gals. \$6.00.

Partly Diluted. 1 gal. makes 8 gals. of solution. 1 gal. 60c., \$2.50 5 gals., 10 gals. \$4.00.

GOOD'S CAUSTIC POTASH WHALE OIL SOAP

Potash whale oil is a necessity in every orchard, nursery and shrubbery garden. By its frequent use San José Scale may be made a stranger. Full directions on each can. 1 lb. 20c., 75c. for 5 lbs., 25 lbs. \$2.50, \$6.00 per 100 lbs.

BANNER LYE

This is an excellent remedy for using in connection with the formula we print here for checking and destroying the scale.

Banner Lye 2 cans
Flowers of Sulphur 4 lbs.
Lime 10 lbs.

Mix the Banner Lye and Flowers of Sulphur dry and then add water sufficient to make a thin paste. Slack 10 lbs. of Lime to make a thick whitewash. Now add the Banner Lye and Sulphur. Stir well.

With a whitewash-brush apply to trunk and larger branches. Now add sufficient water to the remainder to make it thin enough to spray. Then thoroughly spray the tops. The formula given is sufficient for 50 trees. Trees should be treated in the Fall and Spring.

The spray must be omitted when trees are in foliage. Trunks and branches can be washed to advantage at any time.

Price of Banner Lye

15c. per can, per doz. cans \$1.75.

Price of Sulphur

See Pages 100 and 101 for Full Line of Sprayers for Applying the above Preparations

Nature's Plant Food

"Bonora" is exceedingly valuable for garden use, and when applied to vegetables, roses, or any variety of plant life, causes them to mature two to three weeks earlier, encourages a strong quick growth, and increases the quantity and quality. It is especially useful for early peas, cauliflower, lettuce, beans, beets, spinach, radishes, asparagus, etc., where a quick growth is desired. Two or three applications after the seed first comes up, applied at intervals of a week or so, will produce marvelous results. A row

"BONORA"

The Elixir of Plant Life

of Tomatoes treated with "Bonora" last year came into bearing three weeks earlier, and produced nearly twice as much, as a row where it was not applied. This makes the cheapest preparation in liquid fertilizer to be had.

The GREAT LABOR SAVER. FAIRMOUNT WEED KILLER.

This excellent remedy for destroying weeds is every year proving itself more valuable. It is used to greatest of advantage in keeping free from weeds; walks, drives and roadways. The labor involved is very slight. Highly endorsed by leading Park and Cemetery Superintendents, also by Steam and Electric Railroads, for keeping road-beds free from growth of weeds and grass.

REMEMBER, FAIRMOUNT WEED KILLER IS NOT INTENDED for sprinkling on grass-plots or lawns and other places where plants grow, as it kills all growth of plant life it comes in contact with. It is for killing weeds and other growth only.

TESTIMONIALS:

Office of
WEST LAUREL HILL CEMETERY CO.
PENCYD P. O., PA.

We write to say that we have used Weed Killer for the past four years on several miles of our roads; we find it so economical and effect, that weeds in our roads are no longer an item of expense or trouble.

Yours respectfully,
WEST LAUREL HILL CEMETERY CO.

BRYN MAWR, PA., August 25, 1905.

After having used a trial lot of Weed Killer, I find it gives such good results, I am compelled to use it more extensively.

RICHARD MUELLER.

Gardener to THEO. CRAMP, Esq.

HOW TO USE FAIRMOUNT WEED KILLER:

Make the dilution according to the directions given below and stir thoroughly, apply with a watering can with a good coarse rose. Care should be used to rinse pot or other article of metal with which it comes into contact, carefully to prevent corrosion; apply after a rain storm or shower. It has been known that one or two applications have lasted an entire season. A gallon will make treating liquid for space of 150 square yards.
